COPYING THIS ONTO THE PAPER MAP

Grid references are UTM 32V, read off our own sheets: easting across the top, northing up the side, same numbers printed on N1-N3. "470.1 / 806.4" means the point one tenth of a square east of line 470 and four tenths north of line 806.

WHAT TO MARK	GRID	NOTE
FONDSBU km 0	462.5 / 804.9	start walking – buy food, ask about a DNT key
camp 1 Sat km 9.9	470.1 / 806.4	S shore of Uksedalstjernet 1558
TURN-OFF km 11.5	471.3 / 806.6	Uksedalsbandet, by spot height 1595
GALDEBERGTINDEN 2075	470.1 / 805.5	1.6 km SW of the turn-off, +480 m
Slettmarkpiggen 2164 X	471.5 / 807.3	cross it out – grade III, not this trip
camp 2 Sun km 19.3	476.4 / 802.9	where Langedalen tips down to Bygdin
Torfinnsbu km 21.3	478.3 / 802.5	locked without a DNT key
camp 3 Mon km 28	484.5 / 801.0	anywhere along the shore
Bygdisheim km 32.1	487.4 / 798.9	road resumes
BYGDIN hotell km 33.8	489.4 / 799.6	bus 14:20 Tue 22, ref R9P-DPC-MOH

THE FOUR DAYS

Sat 19	Fondsbu → camp 1	10.0 km	+500 m	leave about 12:00, in camp 16:30
Sun 20	camp 1 → summit → camp 2	13.4 km	+630 m	10.0 walking + 3.4 up the peak
Mon 21	camp 2 → camp 3	~8 km	–500 m	down Langedalen, past Torfinnsbu
Tue 22	camp 3 → Bygdin	~5.8 km	flat	leave 07:30, there 10:30, bus 14:20

37.2 km on foot in total - 33.8 km of trail plus 3.4 km for the summit.

HOW GOOD ARE THESE NUMBERS

No GPX – ut.no and the rest are blocked from this session, so nothing was downloaded. Everything here was measured off our own PDF sheets: the red route line traced pixel by pixel and scaled on the UTM grid. Check: Fondsbu→Bygdisheim came out 32.25 km against the 32.1 km printed on sheet N2, so grid refs are good to roughly ±150 m.

The violet dashes up Galdebergtinden are the one thing NOT measured from a track – they are drawn from the written description (ledge system west onto the ridge). Treat that line as a direction, not a path, and pick the real one with your eyes on the day.
